Behind the LENS

Behind the Lens will be a group for participants to learn skills in photography, videography, editing, marketing and social media.

Participants will have the opportunity to explore their creative side, and build skills such as technical photography and videography skills, patience and concentration, attention to detail, teamwork skills, marketing and social media techniques.

Participants will use filming and editing equipment to develop short videos for use on social media. In pre-production, participants will use storyboarding and script writing techniques to develop ideas for short videos. They then will film, using professional techniques, and edit the footage to produce a finished product.

Marketing and social media concepts and techniques will also be explored and developed through Behind the Lens.
